EDUCATION

Yothinburana School, Bangkok

English – Mathematics Program GPA 3.58

2020 - 2023

Bangkok University, Pathum Thani

School of Information Technology and Innovation, Computer Science
GPA 3.69

2023 - present

INTERNSHIP EXPERIENCE

Allmass Idea Co., Ltd.

UX/UI Design and AI Product Intern | Bangkok, Thailand

May – August 2026

- Designed user flows, wireframes, high-fidelity interfaces, and interactive prototypes for AI-assisted digital products.
- Collaborated with the product team to refine requirements and improve usability, visual consistency, and user experience.
- Researched user needs, competitors, and relevant AI technologies to support product decisions.
- Contributed to sports analytics and beauty-commerce concepts through UX/UI design and product research.

KombatX.ai — AI Sports Analytics Platform

Internship Project | UX/UI Designer and AI Model Training Contributor

- Contributed to an AI-assisted sports analytics concept for presenting Muay Thai performance information through an accessible dashboard.
- Designed interfaces for visualising match statistics, strike data, performance indicators, and athlete comparisons.
- Researched computer vision, object detection, and sports analytics approaches to support product and interface decisions.
- Translated complex analytical information into clearer visual structures, making performance data easier to interpret.

AI Skin Analysis — Beauty-Commerce Product Concept

Internship Project | UX/UI Designer and AI Model Training Contributor

- Designed an AI-assisted beauty-commerce concept connecting skin analysis with personalised skincare and wellness recommendations.
- Created the interface flow from onboarding and image submission to analysis results and product discovery.
- Balanced commercial objectives with usability, trust, personalisation, and clear information hierarchy.
- Produced high-fidelity mobile screens and an interactive Figma prototype representing the proposed customer experience.

ACTIVITIES

BU Empowering Hackathon 2026 - Researcher and AI Model Training Contributor

- Researched relevant datasets and AI approaches to support the team in developing a proposed solution within a limited hackathon timeframe.
- Collaborated with team members on problem definition, AI experimentation, and presentation preparation, strengthening rapid problem-solving and teamwork under pressure.

KAIT International Programme 2026 - International Exchange Buddy and Project Team Member

- Supported Japanese exchange students during academic and cultural activities, helping them communicate and adapt to the university environment.
- Collaborated in a multicultural team on an AI-related project, contributing to research, coordination, and presentation preparation within the one-month programme.

Bangkok University Open House 2024 — Faculty and Programme Representative

- Represented the School of Information Technology and Innovation by introducing its academic programmes and the Computer Science major to prospective students.
- Answered visitors' questions and coordinated with student representatives to provide clear information and support a welcoming event experience.

UNIVERSITY PROJECTS

Sketch2Spec — AI-Assisted Floor Plan Concept

SCG Industry Challenge | UX/UI Designer and Product Researcher

- Developed a PropTech concept addressing the difficulty of converting rough floor-plan sketches into clearer digital representations.
- Designed the product interface and interactive prototype in Figma, focusing on usability, accessibility, and clear information presentation.
- Researched computer vision, object detection, image segmentation, and 3D visualisation technologies to assess their suitability for the concept.
- Contributed to problem framing, product ideation, and presentation development, resulting in a structured concept suitable for an industry-focused challenge.

ShadeRoute — Shaded Campus Navigation Concept

KAIT International Programme 2026 | Product Designer and Researcher

- Designed a campus route-planning concept that helps users compare routes based on walking distance and estimated shade coverage.
- Researched geospatial and environmental data sources, including OpenStreetMap, OSMnx, and SunCalc.
- Developed user flows and interface concepts for Nearest, Most Shaded, and Optimal route options.
- Collaborated with Japanese and Thai team members to combine research and design findings into a cross-cultural project presentation.

My Day — Personalised Cycle-Tracking Application, UI Designer

- Designed a personalised cycle-tracking application to address the complexity and formal tone commonly found in health-tracking experiences.
- Created onboarding, dashboard, calendar, tracking, theme customisation, and health-goal selection flows to support different user needs.
- Applied UX principles including progressive disclosure, emotional design, usability, and personalisation to create a more approachable experience.
- Produced the user flow, design system, high-fidelity interface, and interactive Figma prototype, resulting in a clear and consistent end-to-end product concept.

ADDITIONAL

Technical Skills

Programming: Basic Python

AI and Computer Vision: YOLO, OpenCV, Segment Anything Model (SAM), MediaPipe

Data and Development Tools: Google Colab, Kaggle, Git, GitHub, VS Code, Roboflow

Design Skills

UX/UI Design: User Flows, Wireframing, High-Fidelity UI Design, Interactive Prototyping

User Experience: User Research, Usability Testing, Information Architecture, Responsive Design

Design Systems: Components, Typography, Colour Systems, Layout and Visual Consistency

Tools: Figma, FigJam, Notion

Methods: Design Thinking, Agile, Scrum, Waterfall

Product and Business Skills

Product Research, Problem Framing, Product Concept Development, Competitor Research, Business Model Canvas, SWOT Analysis, AARRR Framework, Presentation Design

Professional Skills

Cross-functional Collaboration, Communication, Problem-Solving, Presentation, Time Management, Adaptability, Attention to Detail
